

MERCK

The BioReliance[®] brand

We know that bringing pharma and biopharma healthcare solutions to life is a complex process that requires specialist knowledge and expertise at every step. That's why the BioReliance[®] portfolio offers exceptional risk-mitigating approaches, testing, manufacturing, and complete solutions to help you get life-changing therapies to market faster.

The Life Science Business of Merck operates as MilliporeSigma in the US and Canada.

Pharma & Biopharma
Manufacturing &
Testing Services

We form powerful partnerships

The extensive manufacturing expertise of the BioReliance® brand spans both gene therapy and monoclonal antibodies (mAbs). Through our viral vector manufacturing services, the BioReliance® brand partners with leading gene therapy innovators from clinical development to commercialization, providing scale up, process validation, and commercial manufacturing to support you wherever you need it. As a product innovator and CDMO with over 20 years of experience, our viral and gene therapy manufacturing team has produced more than 500 batches of virus to support gene therapy development.

BioReliance® End-to-End Solutions provides adaptive contract development & GMP manufacturing services for monoclonal antibodies from early clinical to commercial stage. Whether you're seeking to speed up your early clinical development stages, or need guidance and support to establish your commercial manufacturing strategy, we're always thinking about your next step. With more than 30 years of experience in mammalian cell based process development and GMP clinical production, we've executed 250+ projects ranging from 3 to 2,000 liter scale. We also support you with the scale up, validation and technical transfer of the process for your molecule(s) going commercial, wherever and whenever you need to. Should it be to a CMO partner or to your own facility that we can help you design and equip with our team of engineering experts.

We redefine safety and efficacy

The BioReliance® brand is the leading provider of contract testing services in the biopharmaceutical industry. We support every phase of development and the manufacturing process with comprehensive and integrated services, and have led the testing industry for more than 70 years. Our in-depth understanding of regulatory requirements and excellent documentation means we are trusted by leading regulatory authorities, minimizing risk as you take your product to market.
